#### **DETAILED ACTION**

#### Election/Restrictions

1. Applicant's election without traverse of Species I, claims 1-5, 12 and 13 in the reply filed on 07/12/2007 is acknowledged.

# **Priority**

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d),
 which papers have been placed of record in the file.

# Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35
U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors

Protection Act of 1999 (AIPA) and the Intellectual Property and High

Technology Technical Amendments Act of 2002 do not apply when the

reference is a U.S. patent resulting directly or indirectly from an

international application filed before November 29, 2000. Therefore, the

Art Unit: 2614

prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-5, 12 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by US patent number 7,110,535 (Bodley et al).
Regard, claim 1, Bodley et al discloses a headset (figures 1-27) comprising a transducer (14), a microphone (19) and an ear hook (6) for suspending the headset from a user's ear, wherein the transducer, the microphone and the ear hook are encapsulated in a housing or are integral parts of a housing.

Regarding claim 2, Bodley et al also discloses wherein the housing is formed by two shells (12, 2) which are interconnected by a hinge (5). Regarding claims 3 and 4, Bodley et al further shows wherein the two shells are connected along their outer edge with the hinge by a shaft which is disposed in the same plane as the surface of the shells and wherein the hinge has a shaft which is perpendicular to the surface of the shells (see figures 1-7).

Regarding claim 5, Bodley et al also shows wherein the transducer and the ear hook are arranged in the one shell, while the microphone is arranged in the other shell (see figures 1-7).

Regarding claims 12 and 13, Bodley et al also discloses wherein the housing is provided with a lock for locking the ear hook, the microphone and the transducer inside the housing and wherein the lock is provided

Application/Control Number: 10/533,674

Art Unit: 2614

with an electrical code for activating the electrical parts of the headset (column 10 lines 30-57).
